Promoting Renewable Energy and Sustainability Since 1972

May 12, 2008

Dear Vendor of Solar and/or Sustainable Products and Services,

Thanks to federal, state and utility incentives and the high cost (financial and other) of all kinds of fuel, the New Mexico public is looking for ways to reduce energy use in their homes, businesses and transportation. They seek sustainable products and services and they need to know who does what.

New Mexico Solar Energy Association (NMSEA) has such a listing...the **Solar and Sustainable Directory**, recently renamed to more accurately portray its contents. NMSEA has promoted solar and related arts, sciences and technologies since its inception in 1972. Its foundation was the sharing of technology on passive solar design, solar thermal efficiency and solar electricity. These are complimented by energy efficiency and conservation, water catchment and efficient use, sustainable fuels and efficient vehicles, energy-efficient appliances and building materials, green financial products, recycling, education and other sustainable products and services. *Daily, the NMSEA office refers people to the Directory on our website.*

Companies which have a valid New Mexico CRS ID (taxation ID) and offer services and existing products in such areas are invited to register in the directory. The directory will be published in summer and will be sold at the Solar Fiesta and throughout the year. It will be available free on our website with links to registered companies' websites.

The financial details: ***Business members of NMSEA (\$75/yr) will be listed for no charge. (Refer to the registration form for NMSEA Individual Member pricing.) Non-members will be charged \$50. Non-profit organizations may list for \$25.***

A business may list its company in five categories for its initial fee. (See the Groups, Categories and Services document for the category listings.) Additional categories may be included for a fee of \$10 per category (non-profits - \$5 per category). Minimal cost for big impact!

As you see, this year's directory's listings will be more detailed than in past directories. This is the first time we've included specific categories and services. We encourage you to include what you uniquely handle as well as your bread-and-butter options. Check the web version for a more current listing of the *Categories*. Let us know if you have a sustainable product or service that is not listed.

The final deadline is 5/27, the day after Memorial Day. Please help us support you, the solar industry and the world at large by listing in this directory! Register on the enclosed form.

Keep in mind other opportunities to connect with the green-minded public. NMSEA's biggest events are the ***Taos Solar Music Festival/Solar Village (6/27-29)***, ***Solar Fiesta (9/20-21)*** and ***Synergy Fest (April 09)***. Find information about these and other earth-friendly events on our website.

Please contact me if you have any questions. We look forward to your registration for the ***Solar and Sustainable Directory!***

Thank you!
